

Investor Factsheet

Corporate Profile

Link Net is a leading provider of high-speed next generation broadband ("NGBB") and cable TV in Indonesia, serving the residential and enterprise markets across Greater Jakarta, Greater Surabaya and Bandung. Link Net's compelling products and services are based on technologically advanced Hybrid Fibre-Coaxial cable ("HFC") and DOCSIS 3.0 network to provide high-speed internet access (up to 800 Mbps) and richly differentiated TV content with the largest HD channels available.

Link Net's strong growth trajectory is anchored in our technologically superior network, innovative product offering and capability in growing homes passed consistently every year, reaching 1.6 million in first half of 2015. Focusing on Indonesia's large and fast growing affluent middle class, Link Net's market leading position enables successful execution of our strategies to drive future growth.

On 2 June 2014, Link Net was successfully listed on IDX under the ticker "LINK".
